

One-Two Punch

Metadata-Driven

-  Self-configure your Locus software without intervention or invoices from the vendor.
-  Add new data elements, modify workflows, change rules, or change what is being reported – it's all configurable by power users.

Multitenancy

-  Instantly roll out your custom configurations to your users without interruption to operations.
-  Easily scale your EHS programs up or down and across multiple facilities.

Locus is the only EHS compliance software with the **one-two punch** architecture.

Our clients:

-  Easily adapt to shifting requirements.
-  Always have the latest functionality.
-  Align their software to their operations.
-  Are positioned to truly use AI across data.
